

# BELAIR LASER KIT CUTTING

EUROPE'S LARGEST ACCREDITED KIT CUTTERS TO HOSTETLER, ZIROLI, DON SMITH, JERRY BATES, PALMER, VAILLY AVIATION, DAVE PLATT, MEISTER & OTHER LEADING DESIGNERS.

**Belair Kits** use the latest Laser cutting facilities to produce accurate kits for most of the world's finest model designers, including **Nick Zirolì, Wendell Hostetler, Jerry Bates, Don Smith, Kerry Sterner, David Andersen, Dave Platt & Dan Palmer, Vailly Aviation, Vance Mosher and now MEISTER SCALE**

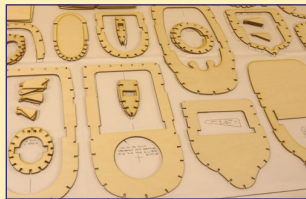

Laser cut parts will speed up construction, increase accuracy and make your next project a pleasure to build. The finish of the parts is very smooth and requires no preparation prior to fitting. Laser cutting does not affect the effectiveness of any glue, so you can use your favorite adhesives with confidence.

Our partial kits include all the laser cut wooden parts, typically ribs, wing tips, fuselage sides, doublers, formers, bulkheads, shaped spars, undercarriage mounts. All parts are etched with part numbers, just add sheet and strip wood. Our kits save hours of tedious cutting.

With a Belair Partial Kit you can start building as soon as you roll the plan out.

We are also able to economically produce one off kits from your plans.

**GET YOUR NEXT PROJECT OFF TO A GREAT START WITH A BELAIR LASER CUT KIT.**

Belair are now exclusive kit cutters to

Focke Wulf FW190 D9

Messerschmitt Me109 G/K

**Meister P-47 Thunderbolt**  
built by Frank Tiano
